Green Gain™ FERTILISER

1-for-all™

Multipurpose Fertiliser

13:3:8 (24) WS*, NCL**

*Water-soluble
**Negligible Chlorine Levels (0,00001%)

Reg. No. K8241 Act 36 of 1947 (South Africa)
Reg. No. N-F 0929 Act 36 of 1947 (Namibia)
Group 1 Fertiliser

134.4 g/kg **N** | 31.5 g/kg **P** | 81.8 g/kg **K**
24.7 g/kg **Ca** | 11.0 g/kg **Mg** | 107.8 g/kg **S**
Plus trace elements: **Fe, Cu, Zn, Mn, B & Mo**

Carbon enriched fertiliser for lawns, roses, flowering plants, vegetables, evergreens, groundcovers, fruit-bearing plants, acid-loving plants, herbs and pot plants.

DIRECTIONS FOR USE

(50 g = 50 ml approximately)

LAWNS (e.g. kikuyu)

VELD GRASSES (e.g. garden setaria)

GROUNDCOVERS (e.g. ivy)

- Apply to planted area at 25 g/m^2

EVERGREEN ORNAMENTAL PLANTS (e.g. conifers, palms, cycad, etc.)

- Apply 50 g per established plant up to 2 m in height. For young, newly planted plants, apply 25 g per plant. For plants taller than 2 m, increase application with 25 g for every additional 2 m height to a maximum of 250 g per tree.

VEGETABLES (e.g. tomatoes, peppers, cauliflower, cabbage, spinach, carrots, etc.)

ANNUAL HERBS (e.g. fennel, coriander, etc.)

BEDDING PLANTS (e.g. petunias, pansies, etc.)

- Apply 12.5 g/m^2 to root zone, starting directly after transplanting of seedlings. Dosage can be increased to 25 g/m^2 after 4 to 6 weeks from day of planting and to a maximum of 50 g/m^2 for plants 1 m and higher. Do not use on newly emerged seedlings grown from seed; only at time of transplanting at the lowest dosage rate.

ROSES, PERENNIAL HERBS (e.g. lavender, rosemary)

FLOWERING SHRUBS (including acid-loving plants like azalea and camellia)

- For young, newly planted plants, apply 12.5 g per plant. Apply 25 g per established plant of 0.5 m to 1 m in height. For plants taller than 1 m, increase application to between 50 g and 75 g per plant.

CONTAINER / POT PLANT USE:

EVERGREEN and FLOWERING PLANTS (e.g. palm, fern, ficus, conifer, schefflera, azalea, etc.)

- Apply measured quantities to potted plants as recommended per pot size.

POT SIZE	QUANTITY per POT
20 – 25 cm	5 g
30 – 35 cm	10 g
40 – 45 cm	15 g
50 – 90 cm	20 g

IMPORTANT INFORMATION:

- Avoid application on wet leaves and foliage; granules might stick to leaves causing burn.
- Always water well after any application.
- Start first application at the beginning of the growing season.
- Repeat every 4 to 6 weeks throughout the growing season, or when nutrient deficiencies show.
- Apply fertiliser over total root zone area of plant.
- Midday (12 pm) canopy shade is an indication of total root area. For pencil-shaped plants, double shade area to determine root area.

Due to this product's composition, compacting may occur during packaging and transportation. A light shake might be required to loosen the product.

- One fertiliser for the whole garden
- Water-soluble
- Negligible chlorine levels (0,00001%)
- Contains carbon and humates
- Biological composition
- Contains NO fillers!
