

DOSAGES:

Koi Ponds, Water features and Garden Ponds:

In the first month and during the summer months apply 80ml per square metre of water surface once monthly. Thereafter apply 50 ml Clear Pond once monthly. During winter months apply 50 ml once monthly per square metre of water surface. For ease of application dilute the above dosages with 500 ml chlorine-free water and apply.

INGREDIENTS:

23 species of live microorganisms representing 10 different genera

Bacteria: Gram + and gram – strains that degrade carbohydrates, proteins and lipids with some strains that are able to reduce the levels of hydrogen sulphide and metabolize various forms of inorganic nitrogen.

Actinomycetes: Specialised group of bacteria that can degrade complex polymers such as cellulose, chitin, their intermediates and related compounds.

Fungi: Unicellular fungi with complementary degradation skills.

Makhero Clear Pond is made from naturally occurring microbes and contains no ingredients hazardous to humans, plants or animals.

HANDLING:

- Do not ingest, ingestion may cause diarrhea.
- Wash hands with soap and water after use.

Storage: Store at room temperature and out of direct sunlight.

Shelf life: At room temperature the product should maintain its predicted activity for 14 months.

Clear Pond

Makhero Clear Pond uses natural microbes to enhance the environment of your pond providing benefits to both fish and flora.

Makhero Clear Pond reduces nitrates, phosphates and sludge build up, helping to achieve a healthy microbial balance in your pond – rapidly improving water clarity.

Makhero Clear Pond comprises 20+ strains of healthy, natural microbes and their metabolites which outcompete algae for nutrients improving water quality and reducing the sludge that attracts harmful pathogens. In addition, our billions of microbes can neutralise toxic substances that can cause harm to your fish.

RAPIDLY IMPROVING WATER CLARITY
