

#### USAGE:

- Ensure garden refuse has been chopped to a height no longer than 15 cm.
- Start the composting process by applying 50 ml of Makhro Compost Activator per 5 liters of chlorine free water to the raw material. Wet compost with this mixture until the water starts to run-off.
- If not using a composting container, cover compost with a UV-resistant water-proof plastic or PVC sheet.
- Turn and re-apply every 2 weeks and re-cover.
- By using this method, the compost will be ready in approximately 6 weeks.

#### INGREDIENTS:

29 Species of live micro-organisms representing 11 different genera

**29 Strains of healthy bacteria that degrades carbohydrates, proteins and lipids with some strains that are able to reduce harsh smells.**

#### STORAGE:

Store at room temperature and out of direct sunlight.

#### HANDLING:

- Do no digest, ingestion may cause diarrhea.
- Wash hands with soap and water after use.

#### SHELF LIFE:

At room temperature the product should maintain its predicted activity for 14 months. When kept in a refrigerator this will be extended to 18 months. Keep away from freezer.

**Shake to wake.**

500 ml

# Compost Activator

**Makhro Compost Activator is 100% natural and biodegradable.**

Formulated from 100% natural microbes, Makhro Compost Activator will convert garden waste into compost for the garden in as little as six weeks.

It contains 29 strains of bacteria that degrade waste, with some strains able to reduce harsh smells.

Billions of beneficial microbes alive and ready to degrade organic waste.

One 500 ml container is enough for up to 2 tons of compost.
