

# Drain Clean

- Natural drain cleaner and odour reducer.
  - Billions of healthy living microbes.
  - Able to digest cooking oils and fats.
    - Non-corrosive.
- Not harmful to humans, plants and animals.

100%  
NATURAL  
MICROBES

**COMPOSITION:** 23 different strains of free living microbes. Bacteria: Gram + and gram - that degrade carbohydrates, protein & lipids with some representatives that can reduce levels of hydrogen sulfide. Actinomycetes: Soil bacteria that have the ability to degrade long chain polymers. Fungi: Unicellular & mycelial representatives that have the ability to degrade long chain polysaccharides, lipids & proteins, some under low oxygen tension.

**HANDLING:** Do not ingest, ingestion may cause diarrhoea. If ingested, drink lots of water. For skin contact, wash with soap & water. We recommend using gloves and safety glasses when handling this product. Please email us for MSDS and Technical Information. Storage: Store in a shaded, cool ventilated area. Temperature should not exceed 30°C. Keep out of direct sunlight. Shelf Life: At Room temperature the product should maintain its predicted activity for 14 months.

**APPLICATION:** Enhanced drain clean, odour reducer, fat and oil digester.

**DOSAGES :** Begin by pouring a boost dose of 250ml directly into the drains of concern. Dosing should only be done at night time or once your taps have been closed for the night/day. This will allow many hours for the microbes to digest the organic waste in the pipes. The longer the contact time the better the results. A repeat dosage may be necessary with dense blockages. Once your drains are clear from blockages a maintenance dose of 50mls weekly will be necessary to avoid an accumulation of organic waste and odours. SmellAway microbes can be used in conjunction with a greywater or septic tank.
