MAKHROROOT No. 3

L10271 - Act 36 of 1947

GROUPCODE B2

Active Ingredient: 4-Indole-3 Butyric Acid 8 g / kg

Registration Holder: Makhro Home and Garden (Pty) Ltd (2014/283523/07)

Office No: 021 981 4011

21 Viben Street, Brackenfell

Technical advice: 082 562 5330

Medical Emergency: 0861 555 777

MAKHROROOT No. 3 is a Hormone Powder to be used on hardwood cuttings to stimulate fast and prolific rootings.

NOTES:

- As soon as the plant-cutting is dipped in the powder, the auxin is absorbed, resulting in the rapid stimulation of root-forming.
- Over stimulation may injure the cutting, as where under stimulation may not give satisfactory result.
- Lateral shoots of the current year's growth are the best. Each specie however determines its own method of propagation. The cutting must preferably be cut at a node and cleaned from lower leaves. Moisten the lower part of the cutting and dip the bottom 10-15 mm in the powder. Shake off excess powder and plant the cutting in the right medium.

DISCLAIMER

Although MAKHROROOT No. 3 has intensively been tested under various conditions, the Registration Holder does not guarantee that the product will be efficacious under all conditions, since all factors such as climate, incompatibility with other substances used, not indicated on the label, growing medium, temperature and storage conditions are all influential to the efficacy and end results. The Registration holder will also not be held accountable for any damage to crops, environment damage, or harm to man or animals, or for lack of performance of the product due to failure of the user to comply with the instructions, as indicated on the label or to the occurrence of conditions which could not have been foreseen in terms of the registration. Should there be any uncertainty, consult the supplier.

WARNINGS:

1. Store in a cool place, away from food and feed.
2. Keep out of reach of children, uninformed persons and animals.

PRECAUTIONS:

- Avoid contact with eyes, rinse immediately with water, should contact occur.
- Prevent contamination of food, drinking water or eating utensils.
- Do not inhale the dust.
- Perforate and flatten the empty container. Do not re-use for any other purpose.

FIRST AID TREATMENT:

Eye contact: Rinse eyes immediately with plenty of clean water, occasionally lifting the upper and lower eyelids for 10-15 minutes.

Ingestion: Wash mouth with water. Give 2-4 cups of milk. Keep patient as rest. If required, obtain medical aid.

Skin: Remove contaminated clothing. Wash with soap and water. If required, obtain medical aid.

Advise to physician: Nonspecific antidote known, symptom and support treatment. Give summary of symptoms/product info to physician.

Aucuba	Dovyalis	Nandina	
Azalia	Eleagnus	Olea	
Banksia	Escallonia	Osmanthus	
Berberis	Fraxinus	Petrea	
Betula	Grevillea	Photinia	
Bougainvillea	Hoya	Pyracantha	
Buxus	Ilex	Raphiolepis	
Callistemon	Juniperus	Rhus	

MAKHROROOT Nr. 3

L10271 - Wet 36 van 1947

GROEPKODE B2

Aktiewe Bestanddeel: 4-Ondoliel-3 Bottersuur 8 g / kg

Registrasiehouer: Makhro Home and Garden (Pty) Ltd (2014/283523/07)

Kantoor Nr: 021 981 4011

Vibenstraat 21, Brackenfell

Tegniese advies: 082 562 5330

Mediese nood: 0861 555 777

MAKHROROOT Nr. 3 is 'n hormoonpoeier wat op hardehoutsteggies gebruik word om vinnige en produktiewe wortels te stimuleer.

NOTAS:

- Sodra die plant steggie in die poeier gedoop word, word die auxien geabsorbeer, wat die vinnige stimulerings van wortelvorming tot gevolg het.
- Oor-stimulasie kan die steggie beseer, waar onder-stimulasie nie bevredigende resultate kan gee nie.
- Laterale lote van die huidige jaar se groei is die beste. Elke spesie bepaal egter sy eie metode van voortplanting. Die steggie moet verkieslik by 'n knoop gesny word en van laer blare skoongemaak word. Vog die onderste gedeelte van die steggie en doop die bodem 10-15 mm in die poeier. Skud oortollige poeier af en plant die steggie in die regte medium.

VRYWARING

Alhoewel MAKHROROOT Nr. 3 intensief onder verskillende toestande getoets is, waarborg die Registrasiehouer nie dat die produk onder alle toestande doeltreffend sal wees nie, aangesien alle faktore soos klimaat, onverenigbaarheid met ander stowwe wat gebruik word, wat nie op die etiket aangedui word nie. Temperatuur en bergingstoestand is almal invloedryk op die doeltreffendheid en eindresultate. Die Registrasiehouer sal ook nie aanspreeklik gehou word vir enige skade aan gewasse, omgewingsbeskadiging of skade aan die mens of diere of vir die gebrek aan prestasie van die produk as gevolg van die versuim van die gebruiker om aan die instruksies te voldoen soos aangedui op die etiket of aan die voorkoms van voorwaardes wat nie ingevolge deur die Registrasiehouer kon voorsien word nie. Indien daar enige onsekerheid is, raadpleeg die verskaffer.

WAARSKUWINGS:

- Berg in 'n koel plek weg van voedsel en voer.
- Hou buite bereik van kinders, oningeligte persone en diere.

VOORSORGMATREËLS:

- Vermyn kontak met die oë, spoel dadelik met water, indien kontak plaasvind.
- Voorkom besoedeling van voedsel, drinkwater of eetgerei.
- Moenie die stof inasem nie.
- Perforeer die leë houers en druk dit plat. Moet dit vir geen ander doel hergebruik nie.

NOODHULPBEHANDELING:

- Oogkontak:** Spoel die oë onmiddellik met baie skoon water af, en lig die boonste en onderste ooglede af en toe vir 10-15 minute.
- Inslukking:** Was mond met water. Gee 2-4 koppies melk. Hou pasiënt rustig. Indien nodig, kry mediese hulp.
- Vel:** Verwyder besoedelde klere. Was met seep en water. Indien nodig, kry mediese hulp.
- Advies aan dokter:** Nie-spesifieke teenmiddel bekend, simptom- en ondersteuningsbehandeling. Gee opsomming van simptome / produkinieligting aan die dokter.
