Waterwise® 3D is a highly effective, pet and aquatic friendly wetting agent, for use on your garden, pot plants, trees and lawns. It assists in water penetration and retention, reduces water runoff and evaporation, and improves the efficiency of fertilisers, saving water, time and cost. By using Waterwise® 3D, deeper and denser root growth is encouraged so that less frequent watering is required. Waterwise 3D is fully biodegradable.

Waterwise® 3D contains surfactant that is 100% aquatic safe and can be used around ponds, waterways and other aquatic environments. Note: Waterwise® 3D is not harmful to earthworms.

### DIRECTIONS FOR USE

Dilute 200ml of Waterwise® 3D with 10 litres of water.

Apply with a watering can to up to 20 square meters of surface area. Apply water as normal.

For consistent optimum results, Waterwise recommends the following applications:

APPLICATION	AMOUNT TO APPLY
Gardens	500ml of diluted solution per square metre and water in well. Spring and Summer: every 6-8 weeks or as needed. Autumn and Winter: every 8-12 weeks or as needed.
Lawns	1 litre of diluted solution per square metre and water in well. Spring and Summer: every 6-8 weeks or as needed. Autumn and Winter: every 8-12 weeks or as needed.
Potted Plants/ Hanging Baskets	Apply diluted solution to the pot or hanging basket until it drains from the bottom of the pot/ basket. Apply twice a year at the start of Spring and start of Autumn.

Can be used as a Drench: Place 10ml (one cap full) of Waterwise® 3D into 10 litre watering can, fill can and water as a drench to targeted area.

For best results apply Waterwise® 3D in the cool of the day, early morning or evening. To ensure the full efficiency of the product, after applying Waterwise® 3D, make sure that any liquid remaining on the leaves is washed off and watered in well.
