### PRODUCT ANALYSIS

NUTRIENTS		MICRO-NUTRIENTS	
Total Nitrogen (N) .....	15%	Iron (Fe) .....	0.45%
Nitrate-nitrogen (N-NO3) .....	6.6%	Manganese (Mn) .....	0.07%
Ammoniacal nitrogen (N-NH4) ..	8.4%	Copper (Cu) .....	0.05%
Phosphorous (P) .....	3%	Molybdenum (Mo) ..	0.009%
Potassium (K) .....	12%	Zinc (Zn) .....	0.07%
Magnesium (Mg) .....	1.2%	Boron (B) .....	0.03%
Sulfur (S) .....	7%	Calcium (Ca) .....	1%

### General application guidelines

Best time of application is Spring, but Multicote™ may be used all year round. Adjust the application rate according to the plant's sensitivity.

**Landscaping – Flowerbeds:** Apply 30 to 60 g per m<sup>2</sup>.

Be sure to spread evenly before turning it into the bed, or cover with a suitable mulch or compost.

**Landscaping – Trees:** Apply 300 g (small tree <2m) up to 1kg per tree (large tree >6m). Divide the dosage per tree into four portions or more, and apply into slots, 5 to 10 cm deep, radiating around the tree, within the wet zone.

**Nurseries – Potted Trees and Perennial Shrubs:** Apply 3 to 8 g per litre of growing medium. Mix the required dosage into the growing medium prior to filling the pots, or dose each pot individually.

# MULTI COTE™ 8

## Controlled Release Fertilizer

A controlled-release, well-balanced fertilizer that provides a steady, continuous supply of essential nutrients at a precise, pre-determined rate and meets the needs of most garden and indoor plants when grown in balanced growing mediums and soils.

**15-3-12 + Mg +  
Micronutrients**

### The advantages of using Multicote™

- Easy, precise application of nutrients for each plant.
- Most advanced fertilizer use efficiency.
- Constant growth throughout the growing season (no saw-tooth effect as a result of fertilizer spikes).
- Enhanced resistance to disease and insect attack.
- Plants can withstand handling and transplant shock better.

**A single application ensures balanced nutrition throughout the growth season, saving labour and costs.**
